Personal Statement

If you're seeking an employee who has computing experience to improve the reliability and development of your company my knowledge in design, implementation and maintenance will prove invaluable. When it comes to design I'm always looking for something new and it comes to me as second nature.

Personal Interests

My personal interests include -

- Rock climbing - This is something that I have come to do every now and then recently due to work commitments. But when I can, I do go just to be active and meet new people. It's good to have a break from work.
- Snow Sports - While being at University, I have joined a society which is snow sports and i have taken up skiing, this includes weekly activities at the nearest ski slope. This is so much fun and something different to what I've done before. This shows that I'm happy with doing something out of my comfort zone.

- While I want to work in the computing industry, I have come to find it a hobby as well. I have created my own website along with other projects and setting up a summer placement. This has all been done off my own back and shows I have a passion for the industry.
